(72) Inventor; and
(75) Inventor/Applicant (*for US only*): BRAY, Patrick, L. [GB/GB]; 261 Commercial Road, Portsmouth, Hampshire PO1 4BP (GB).

For two-letter codes and other abbreviations, refer to the "Guidance Notes on Codes and Abbreviations" appearing at the beginning of each regular issue of the PCT Gazette.

(54) Title: OVEN LINER

(57) Abstract: A microwave oven liner (11) is an injection moulding having a roof (12), a floor (14), a back (15) and two sides (16). The moulding is of food grade polypropylene, such that the liner can be washed in a commercial dishwasher. The liner is sized to be a sliding fit in a microwave oven. The roof is shorter (17) at the front than the floor to allow air circulation. Further, the roof is apertured, also for air circulation, with a series of small c. 4mm bores (18) registering with the roof aperture (8). A lip (19) is provided across the front of the floor to retain split liquid. The external corners (20) are chamfered to clear the silicone seal (9) for instance. The floor has regularly pitched, 2mm high ridges (21) running front to back. The ridges allow circulation of air beneath a container of food being heated in the oven having the liner.
